Litigation Visual Strategy • Biomedical Visualization • Trial Graphics & Complex Evidence

Highland Park, IL • Hybrid / Chicago • (847) 338-8208 • a.james.donnelly@gmail.com • visual portfolio

SUMMARY

Litigation professional and biomedical visualizer with fifteen years of law-firm experience and graduate training in visual art, scientific communication, and medical-legal visualization. Experienced translating complex records, medical evidence, and case theories into clear visual materials for attorneys, clients, and nontechnical audiences. Current graduate research examines how visual and three-dimensional demonstratives affect juror comprehension of medical testimony. Combines litigation judgment, visual design, project management, and a practical understanding of how trial teams prepare and present evidence.

BIOMEDICAL VISUALIZATION & JUROR-COMPREHENSION RESEARCH

M.S. in Biomedical Visualization, University of Illinois Chicago • thesis research

- Design and conduct graduate research comparing oral testimony, two-dimensional medical imaging, three-dimensional digital models, and physical models as methods for communicating complex surgical evidence to jurors.
- Translate laparoscopic anatomy, surgical decision-making, and bile-duct-injury concepts into accurate visual and physical demonstratives for non-medical audiences.
- Develop case-based visual materials using medical imaging, segmentation, three-dimensional modeling, and additive manufacturing (3D printing).
- Collaborate with physicians, certified medical illustrators, researchers, and legal professionals to ensure scientific accuracy, visual clarity, and relevance to the litigation question.
- Evaluate how visual format affects comprehension, perceived complexity, confidence, and analytical reasoning.

LITIGATION EXPERIENCE

Hall Prangle LLC — Chicago, Illinois

May 2025 – Present

Senior Litigation Paralegal • Medical-Malpractice Defense

- Analyze medical records and build medical chronologies and witness timelines in complex, high-value medical-malpractice matters.
- Develop exhibits and demonstrative concepts and prepare materials for depositions, mediations, expert work, and trial.
- Collaborate with attorneys and experts on how to present complex medical evidence clearly and persuasively, and quality-check all materials against source evidence.
- Manage multiple high-pressure litigation assignments to deadline.

Law Offices of Michael M. Mulder — Chicago, Illinois

2013 – 2025

Litigation Paralegal & Firm Operations • selected focus: litigation visualization, presentations, website design, and firm communications

Formerly Meites, Mulder, Mollica & Glink (through 2016).

- Supported complex federal and appellate litigation, developing case themes and factual development, briefing and record support, and trial and hearing preparation in close strategic collaboration with attorneys.
- Organized and analyzed large records (sets approaching one million pages), translating complex information into clear summaries, chronologies, and visual materials.
- Created firm communications, presentations, diagrams and timelines, and brand and website materials over multiple years, building visual and design capability from inside the practice.

SOFTWARE & CAPABILITIES

Visual: medical and scientific illustration; information and demonstrative design; 3D modeling, rendering, and additive manufacturing; presentation design. Software: Adobe Creative Suite (Photoshop, Illustrator, InDesign), Cinema 4D, 3ds Max, PowerPoint; medical imaging and segmentation; 3D printing; instructional-design tools.

Litigation: medical-record analysis, chronologies, and exhibits; deposition, mediation, expert, and trial preparation; plaintiff- and defense-side experience; project management; quality control against source evidence.
